Pick Resistant Handcuffs

Tri-Max® is CTS-Thompson's newest innovation. Our bump and pick resistant technology will enhance officer safety during arrest and in-custody transport situations.

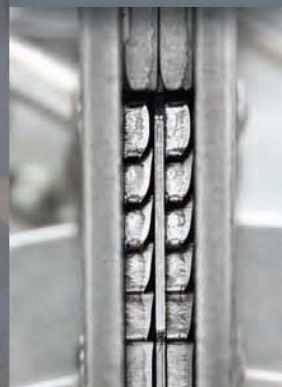

NEW!

Tri-Max® was recently recognized as a finalist for the Law Enforcement Technology Magazine, 2010 Innovation Award.

Dual Ratchet

Pick-Shield XLS™

Tri-Max® patented technology consists of a dual ratchet engaging independent retaining bars separated by a pick-shield. Additionally, Tri-Max® handcuff and legcuff models are constructed from Rockwell C40 hardened steel, incorporating "True-Swing" technology and Positive Clickbak® loading.

Chain Handcuffs

CTS-Thompson offers the traditional style chain handcuffs in a non-reflective dull nickel finish and high visibility color Gorcote® finishes.

Other features common to these CTS-Thompson models:

- Non-reflective dull nickel finish or scratch resistant Gorcote® finishes
- Positive Clickbak® loading
- Rockwell C40 hardened carbon steel
- Oversize swivel and reinforced steel rivets for added strength
- 23 locking positions
- 3 independent retaining bars floating on tempered leaf spring

Color Coder® Transport System

All models featured here are available in eight color Gorcote® finishes

High Visibility Colors:

6000 & 6010 Lead Chains

7000 & 7000FR Waist Chains

Other features common to CTS Thompson transport restraints:

- All chainwork is 0.192 flat interleaving nickel plated chain
- All materials are forged from hardened carbon steel
- Oversizes (72" and 96") are offered for both 7000 and 7000FR
- "Gang Chains" are offered from 3 to 10 stations

6000

Two handcuffs on 60" lead chain with a 2" ring attached

6010

One handcuff on 60" lead chain with a 2" ring attached

7000

Waist chain with handcuffs connected at the left and right side of the body

7000FR

Waist Chain with handcuffs connected together at the front belt buckle

1010/9000AR, 1010/9000H, 7078 Transport Restraint Systems

Transport restraints consist of cuffs and chain components creating a restraint system to prevent escape and limit the potential of violent behaviour during transport

- Lead chains with cuff(s) connecting to one or both wrists. (6000 & 6010)
- Waist chains with a pair of handcuffs attaching both hands on each hip or at the belt buckle area (7000 & 7000FR). Variations may include oversize and Tri-Max®
- Enhanced Transport Restraint Systems combine waist chains and cuffs with legcuffs
 - 1010/9000AR (Auto Restraint) - a permanent 30" length of chain linking a pair of 1010 hand cuffs and 9000 legcuffs
 - 1010/9000H (H-Style) - a permanent 30" length of chain connecting a 7000 waist chain and 9000 legcuffs
 - 7078 chain accessory is a linking chain with rings on both ends connecting any pair of chain handcuffs with any pair of legcuffs

1010/9000 AR

Auto Restraint
Model 1010 handcuffs with 30" chain connecting model 9000 legcuffs

HANDCUFF TRAINING

This program is designed by police and corrections officers. It is specific to the skill of handcuffing and the use of transport restraints. While all officers receive basic training in handcuffing, this program takes it to the next level. The student will be trained in applying restraints on compliant and non-compliant subjects. Additionally, the student will learn and practice methods of movement and escorting of suspects or inmates.

Some of the subjects covered will include:

- Review of restraint options
- Understanding body language and assessing attitudes of suspects or inmates
- Escalation of force options
- Introduce concepts of Contact >>Lock >> Cuff >> Secure
- Practical application of handcuffs and other restraints, such as legcuffs, waist chains, lead chains and the Blue Box™

Information about the SK-3 SpeedKey®:

- Magnetic training key for metallic and non-metallic handcuffs
- Specifically designed to facilitate handcuff training
